

Morgan Homson-Smith - Class of 2014

Southport Football Club has announced the signing of former Priory pupil Morgan Homson-Smith (pictured centre).

A right-winger, Morgan joins the club from the Football Development Agency (FDA) Academy who aim to give young players who have been released from the professional game a competitive environment to showcase their ability.

The left-footed attacking player is confident on the right wing or in a forward position and is another addition with a promising future ahead.

Since March 2018 he has spent time at Prescott Cables, where he has put in some match-winning performances, after moving from Harrogate Town. His other clubs also include AFC Fylde and Kendal Town.

Still based in Preston, 20 year-old Priory alumni has trained with the club recently and impressed the management team immediately, who didn't waste any time in securing his signature.

"We are delighted and proud of what Morgan has achieved since joining the FDA Academy. Morgan is part of a recent group of players who we have worked with and assisted to find a pathway back in to full-time football having been released from the professional game. Morgan optimises what we're all about, giving young, hungry players a second opportunity. Southport have gained a very talented individual." Ian Flannery founder of the FDA (pictured right)
