Jodi's Design for Life

Last Thursday was World Book Day and Priory held a 'design the book cover of your life' competition.

There were over seventy entries from pupils, and most of the staff offered their own witty examples for pupils to see before attempting their own. The standard was extremely high and a panel of eight staff were calling in to shortlist and then decide the winner.

The successful entry was Jodi Emberton, who spent a lot of time designing 'The Life in the Eyes of a Midget.'

She won a carton of sweets for her efforts, but well done to all who entered—the entries were great!

Meet the Governors: Cheryl Barker

I am the Assistant Business Manager at Priory and have been in the post since September '15.

I volunteered to be a staff governor to support my own development and learn more about how a school operates. I am keen to evolve in my role within the school and I am fully committed to making Priory first choice.

I have 12 years experience working in local government, primarily in the Education area, with strengths in HR, Payroll, Health & Safety and business.

The skills I have previously gained have already proven valuable in my role and will provide further support to Priory as a staff governor.

The opportunity to join our welfare team is still available.

Contact s.howarth@priory.lancs.sch.uk for more information.

E-Safety Recommendation

When was the last time you checked your child's mobile phone, iPad or tablet?

As you may be aware, e-safety is paramount here in Priory and we maintain a strict control on the what kind of apps and websites can be accessed in school.

However, we cannot control what happens when your child gets home. With this in mind, we would like to remind you to frequently check your child's mobile phone or tablet in order to make sure your child is safe when accessing the internet.

We recommend asking your child to guide you through any apps that you are unfamiliar with so you can make a decision as to whether you feel the app is suitable or not.

Getting Hands on in Geography

Geography pupils have been getting hands in during lessons in recent weeks, thanks to Mr Watters.

Year 7s have been working on their Mapping Skills, creating contour models using OS and Google Maps as references.

Whilst the Year 9s have been working in teams designing, developing and making earthquake-proof buildings.
